Phonelink User Guide [UK]

First Steps

Before starting the Phonelink, make sure the Bluetooth menu of your mobile phone is open, Bluetooth is switched on and the mobile phone is visible to all nearby Bluetooth devices. Keep the mobile phone's Bluetooth menu open throughout the process.

Start Using Phonelink

Click Applications (1) on the GPS menu.

Click Bluetooth (2) on the GPS menu.

Step1. *Click Settings (3) on the GPS Menu.*

Step2. *Click on Search Phone (4).*
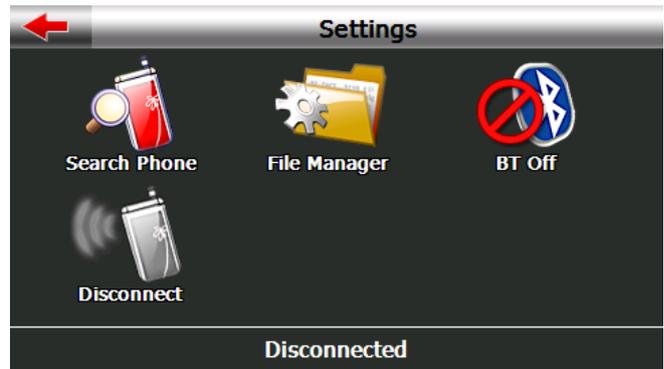

Step3. *Click on the search icon* *in the bottom left corner to start the searching process.*
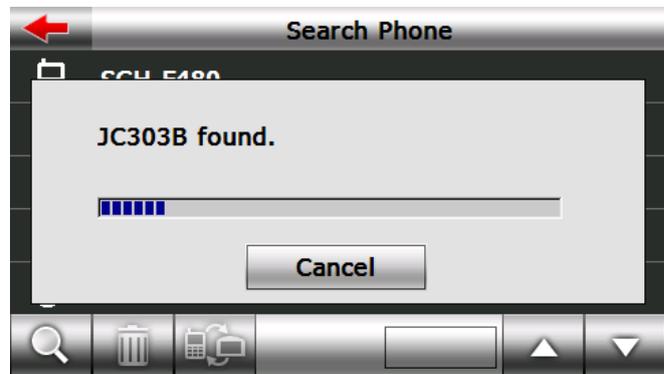

Step4. *When the searching process is complete, look for the handset you would like to use and click on it.*

Step5. *You can also click on the previous page / next page icons* *to scroll through the handsets found.*

Phone Menu

On the Phone Menu, you can choose to manage your Phone Book (A), Call History (B), Dial Pad (C) and other Settings (D).
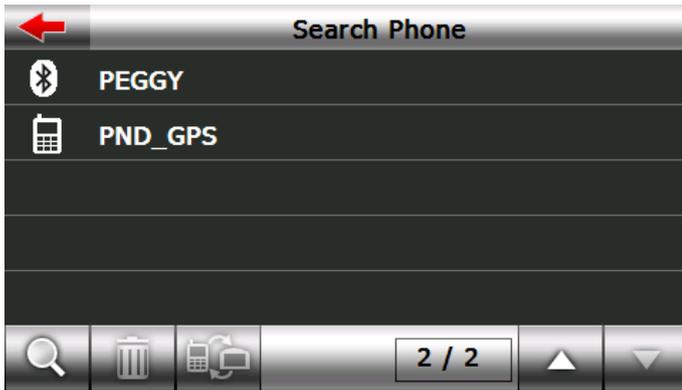

Step6. *Click the pair icon* *, then follow the instructions on your handset to complete the pairing process. The default PIN code is 1234. You can also change the PIN code. The PIN codes that you input on the PND and mobile phone must be the same.*

Click on your chosen item to open its window.

For more information, check the descriptions in each section.

A. Phone Book

Click Phone Book (5) on the Phone Menu. The following screen will appear. You can check your contact list or call log, and either answer or dial calls.
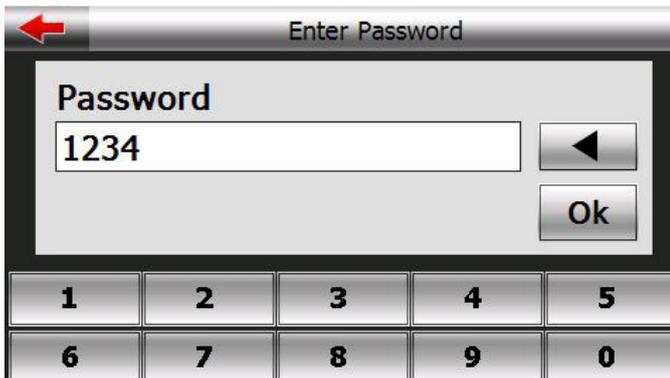

Step7. *Click OK, then allow the pairing of the PND and the mobile phone to proceed. When pairing completes successfully, you will be returned to the Phone Menu.*
 Go back to the previous level. *Down-load phone book*

 Phone book search

1. Click to download the phone book from your mobile phone
